Section 1. Chemical product and company identification

Product name: Ammonia
Supplier: AIRGAS INC., on behalf of its subsidiaries
259 North Radnor-Chester Road
Suite 100
Radnor, PA 19087-5283
1-610-687-5253
Product use: Synthetic/Analytical chemistry.
MSDS #: 001003
Date of Preparation/Revision: 5/11/2011.
In case of emergency: 1-866-734-3438

Section 2. Hazards identification

Physical state: Gas. [COLORLESS GAS OR COLD, MOBILE LIQUID WITH A STRONG, PENETRATING ODOR]
CAUTION!
Do not puncture or incinerate container. Do not breathe gas. Do not get on skin or clothing. May cause target organ damage, based on animal data. Use only with adequate ventilation. Keep container closed. Do not get in eyes, on skin or on clothing. Avoid breathing gas. Wash thoroughly after handling.

Target organs: May cause damage to the following organs: lungs, upper respiratory tract, skin, eyes.
Routes of entry: Inhalation Dermal Eyes

Potential acute health effects

Eyes: Severely corrosive to the eyes. Causes severe burns. Contact with rapidly expanding gas may cause burns or frostbite.
Skin: Severely corrosive to the skin. Causes severe burns. Contact with rapidly expanding gas may cause burns or frostbite.
Inhalation: Severely corrosive to the respiratory system.
Ingestion: Ingestion is not a normal route of exposure for gases

Potential chronic health effects

Chronic effects: May cause target organ damage, based on animal data.
Target organs: May cause damage to the following organs: lungs, upper respiratory tract, skin, eyes.

Medical conditions aggravated by over-exposure: Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.

See toxicological information (Section 11)

# Section 4. First aid measures

No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

**Eye contact**: Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

**Skin contact**: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

**Frostbite**: Try to warm up the frozen tissues and seek medical attention.

**Inhalation**: Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

**Ingestion**: As this product is a gas, refer to the inhalation section.

# Section 5. Fire-fighting measures

**Flammability of the product**: Non-flammable.

**Auto-ignition temperature**: 651.11°C (1204°F)

**Flammable limits**: Lower: 15% Upper: 28%

**Products of combustion**: Decomposition products may include the following materials: nitrogen oxides

**Fire hazards in the presence of various substances**: Extremely flammable in the presence of the following materials or conditions: oxidizing materials.

**Fire-fighting media and instructions**: Use an extinguishing agent suitable for the surrounding fire.

Apply water from a safe distance to cool container and protect surrounding area. If involved in fire, shut off flow immediately if it can be done without risk.

Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode.

**Special protective equipment for fire-fighters**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
**Section 6. Accidental release measures**

**Personal precautions**: Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (section 8). Shut off gas supply if this can be done safely. Isolate area until gas has dispersed.

**Environmental precautions**: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

**Methods for cleaning up**: Immediately contact emergency personnel. Stop leak if without risk. Note: see section 1 for emergency contact information and section 13 for waste disposal.

**Section 7. Handling and storage**

**Handling**: Use only with adequate ventilation. Wash thoroughly after handling. High pressure gas. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Do not get in eyes, on skin or on clothing. Keep container closed. Do not get on skin or clothing. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.

**Storage**: Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

**Section 8. Exposure controls/personal protection**

**Engineering controls**: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

**Personal protection**

**Eyes**: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

**Skin**: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory**: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

The applicable standards are (US) 29 CFR 1910.134 and (Canada) Z94.4-93

**Hands**: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

**Personal protection in case of a large spill**: Self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product. Full chemical-resistant suit and self-contained breathing apparatus should be worn only by trained and authorized persons.

## Section 10. Stability and reactivity

- **Stability and reactivity**: The product is stable.
- **Incompatibility with various substances**: Extremely reactive or incompatible with the following materials: oxidizing materials.
- **Hazardous decomposition products**: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
- **Hazardous polymerization**: Under normal conditions of storage and use, hazardous polymerization will not occur.

Environmental fate: Not available.

Environmental hazards: No known significant effects or critical hazards.

Toxicity to the environment: Not available.

| Product removed from the cylinder must be disposed of in accordance with appropriate Federal, State, local regulation. Return cylinders with residual product to Airgas, Inc. Do not dispose of locally. |

### Section 13. Disposal considerations

- **Acute LC50 4980 to 9070 ug/L Marine water**
  - Crustaceans - Kuruma shrimp - Penaeus japonicus - Nauplii
  - penicillatus - Zoea
  - 48 hours

- **Acute LC50 4180 to 6030 ug/L Fresh water**
  - Daphnia - Water flea - Daphnia magna - <24 hours

- **Acute LC50 4130 to 5100 ug/L Fresh water**
  - Daphnia - Water flea - Daphnia pulex - <24 hours

- **Acute LC50 2710 to 3670 ug/L Fresh water**
  - Daphnia - Water flea - Ceriodaphnia reticulata - <4 hours

- **Acute LC50 2500 ug/L Fresh water**
  - Crustaceans - Aquatic sowbug - Asellus aquaticus - 8 to 10 mm

- **Acute LC50 660 ug/L Fresh water**
  - Fish - common carp - Cyprinus carpio

- **Acute LC50 450 to 470 ug/L Fresh water**
  - Fish - Chinook salmon - Oncorhynchus tshawytscha - Underyearling - 1 to 7 g

- **Acute LC50 440 ug/L Fresh water**
  - Fish - common carp - Cyprinus carpio

- **Acute LC50 380 ug/L Fresh water**
  - Fish - Silver carp - Hypophthalmichthys molitrix - Fingerling

- **Acute LC50 300 ug/L Fresh water**
  - Fish - Carp - Hypophthalmichthys nobilis

### Products of degradation

Products of degradation: nitrogen oxides (NO, NO₂, etc.).
